

What is Kromex®?

Kromex® is a particular product that we use to create 3D labels, it isn't only chrome plating but it is the possibility of creating emblems with different types of finish that identify your high-tech product. This innovative process, allows us to create 3D emblems with variable thickness, (up to 7mm fickle thickness).

THE ADVANTAGES OF 3D LABELS IN KROMEX®

- ✓ Making a prototype in Kromex® is much simpler and has further advantages compared to the traditional one
- ✓ Emblems are printed with both sharp and rounded corners, so you have the ability to print any graphic you can think of on both flat and curved surfaces.
- ✓ You have the possibility to personalize your plate according to your own opinion, creating unique, rare, high aesthetic and qualitative but above all recognisable, printing effects.
- ✓ We can design the file together with you, industrialize it, produce it and offer after-sales customer care assistance.
- ✓ It is possible to realize whole shapes of large dimensions up to a maximum size of 600x300 mm

Your imagination has no limit to what you can do with technology Kromex® to give style, expression or marketing to your emblems.
